## Rettelse nr. 1 til lokomotivplaner for K98 vinter.

Vedlagt følger Rettelse nr. 1 til lokomotivplaner for litra EA, ME og MZ gældende for perioden 15.11.1998 - 09.01.1999.

Der er ingen rettelser til litra MY.

Af hensyn til SAPLS-brugere kan oplyses at materielbasen til K98 vinter hedder *M98-2 (Normaluge 87)*, produktionsbasen hedder *K98-2* og OMPLS-versionen hedder *V9887*.

Følgende betegnelser er anvendt i lokomotivplanerne:

|               |   |                                                                                           |
|---------------|---|-------------------------------------------------------------------------------------------|
| A             | = | Transport af tomt lokomotiv ( <u>A</u> flåst).                                            |
| D             | = | Lokomotivet olieforsynes ( <u>D</u> iesel).                                               |
| F             | = | Forspand, angiver lokomotivets placering i forhold til køreretning og øvrige lokomotiver. |
| H             | = | Lokomotivet kører i depot ( <u>H</u> us).                                                 |
| RFN           | = | <u>R</u> ådighed <u>F</u> or <u>N</u> edbrud.                                             |
| Eftersyn      | = | Udført på værksted.                                                                       |
| TE            | = | <u>T</u> eknisk <u>E</u> ftersyn.                                                         |
| SOK           | = | Anvendes i forbindelse med sporarbejde.                                                   |
| Driftsreserve | = | Ekstraproduktion og korrigerig.                                                           |

**NB** Skiløber-togene starter den 25.12.1998 og bliver indarbejdet i særlige planer for JULEFERIEN 1998.

Søndag den 03.01.1999 og fredag den 08.01.1999 vil Skiløber-togene blive udsendt på korrigerig i følge aftale med DSB trafik, Plan og korrigerig.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                        |                        |                        |                        |               |               |   |   |   |    |    |                 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 1                      | 2                      | 3                      | 4                      | 5             | 6                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                        |                        |                        |               |               |   |   |   |    |    | Od 7210 Ng 3401 |    |    |    |    |    |    |    |    |    |    |    |                    |    |    |    |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |  |                 |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |  |  |  |  |  |  |                    |  |  |  |                 |  |  |  |  |  |  |  |                 |  |  |  |                    |  |
